

About Hawa AG

Our metier since 1965 has been pivoting, sliding and folding hardware systems – along with the fascinating applications they have opened for our customers. Thus, we have grown into a name of international repute within our specialist areas of glass/metal/wood architectural hardware, and hardware for furniture.

We – and hence our customers – are totally committed to Swiss quality. Despite the fact that we now export over 80% of our output, production is located at home in Mettmenstetten. This is not least because our business philosophy is still based on characteristically Swiss values like precision, reliability, and durability.

About this catalogue

Optimising space, creating rooms, solving problems, saving time – our hardware carries an impact that reaches far beyond its essential sliding, stacking and folding functionality. This catalogue provides you with detailed ordering information and technical data for our entire range of glass/metal folding and sliding hardware systems. And should you have a specific requirement in the pipeline, please contact us – we are happy to be of help.

Find out about the rest of the Hawa range:

Architectural hardware glass/metal

- Glass sliding doors with patch suspension
- Glass sliding doors with suspension/retainer profiles
- Glass sliding walls
- Metal sliding doors

Furniture hardware

- Sliding cabinet/wardrobe doors
- Side stacking cabinet/wardrobe doors
- Pivot sliding furniture doors

SoftMove 40 soft closing mechanism for Hawa-Junior 40

	code
SoftMove 40 soft closing mechanism for Hawa-Junior 40 (details: → page 66)	25987
Set for mountable and demountable running track to HAWA-Junior 40 (details: → page 68 – 69)	

Hardware system for sliding doors weighing up to 40 kg (88 lbs.).

Description

The HAWA-Junior 40/Z is a highly reliable hardware system with two-way suspension for wooden sliding doors with a maximum panel weight of 40 kg (88 lbs.). The two-way suspension permits the sliding doors to be suspended or taken off in two different ways.

Features of the HAWA-Junior 40/Z

- Two-way suspension
- Light and silent action
- Adjustable vertically [3 mm $(\frac{1}{8})$] and laterally
- Track stop, adjustable retaining force
- combinable with SoftMove 40 soft closing mechanism for Hawa-Junior 40
- can be combined with assembly set for HAWA-Junior 40 for wall pocket solutions
- with wall pocket solutions use bottom guide 25369

Rattle proof floor guide for wall pocket

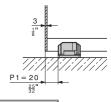

The rattle-proof floor guide [groove width 10 mm $(\frac{13}{32})$ is now 35 mm $(1\frac{3}{8})$ long and laterally adjustable. It enables the door to be pushed into a finished wall pocket.

The following factors play a role in calculating the width of the sliding door:

- Open or closed guide groove
- Design with or without a door push-out (spring-loaded door stop no. 27200)

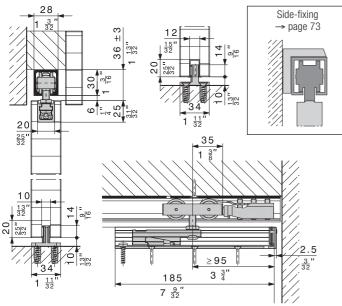

STB = LMB + P1 + 30 mm $(1\frac{3}{16}")$

Planning/installation

For planning and execution please use the installation instructions code 17689. (→ www.hawa.ch → HAWA-Productfinder)
HAWA-Junior hardware may also be used for glass sliding doors.
Please request the corresponding documentation.

Hardware system for sliding doors weighing up to 80 kg (176 lbs.).

Description

The HAWA-Junior 80/Z is a highly reliable hardware system with two-way suspension for wooden sliding doors with a maximum panel weight of 80 kg (176 lbs.). The two-way suspension permits the sliding doors to be suspended or taken off in two different ways.

Features of the HAWA-Junior 80/Z

- Two-way suspension
- · Light and silent action
- Adjustable vertically $[\pm 4 \text{ mm } (\frac{5}{32})]$ and laterally
- Track stop, adjustable retaining force
- Available as a set: HAWA-Junior 80 set including a soft closing mechanism SoftMove 80
 - Minimum door width for one-sided damping: 690 mm (2'3 \frac{3}{16}")
- Minimum door width for two-sided damping: 1030 mm (3'4⁹/₁₆")
- can be combined with assembly set for HAWA-Junior 80 for wall pocket solutions
- with wall pocket solutions use bottom guide 25369

Installation

- 1. Side mounting. Doors to be taken off or suspended without removing a possible cover.
- 2. Front mounting.

Planning/installation

For planning and execution please use the installation instructions code 17689. (\rightarrow www.hawa.ch \rightarrow HAWA-Productfinder)

For convenient operation of sliding doors with soft closing mechanisms, use protruding handles instead of shell handles.

HAWA-Junior hardware may also be used for glass or metal sliding doors. Please request the corresponding documentation.

Click and Clear – easier installation thanks to a clever locking mechanism.

User-friendly hardware system for sliding doors with minimum headroom applications weighing up to 80 kg (176 lbs.).

Description

The HAWA-Junior 80/B (mod.) is a combination of tried-and-tested HAWA-Junior components and a cleverly developed new suspension unit and a new track stop. Both innovations stand out as they are very simple to adjust and make installation so much easier. The suspension trolley houses both the suspension unit and the assembly wedge for innovative installation. The integrated multifunctional cover cap made of metal not only serves as a filigree cover, it also functions as a locking mechanism and as a handle for pulling out the suspension trolley.

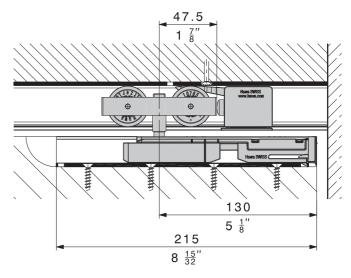

The track stop with adjustable retaining force is characterised by a new design. It is obvious which screws are used for fixing and which ones adjust the retention force to suit the weight of the door. The integrated metal cover cap conceals the integrated technique at the flick of a finger.

Applications

Ideal for optimising room space and making wooden sliding doors easy also disabled users to close, for example in retirement homes, care homes, shopping centres, railway stations, schools and public buildings, as well as in family homes, apartment complexes and hotels.

Features of the HAWA-Junior 80/B (mod.)

- Maximum door weight 80 kg (176 lbs.)
- Adjustable vertically \pm 7 mm ($\frac{9}{32}$ ") [coarse adjustment \pm 3 mm ($\frac{5}{8}$ "), fine adjustment \pm 4 mm ($\frac{5}{32}$ ")]
- Low headroom applications: around 1 mm (¹/₁₆) gap between running track and sliding door
- Suspension unit with a suspension profile and an user-friendly suspension trolley with an integrated metal cover cap
- The suspension unit is fitted to the trolley from below using the suspension screw
- Height adjustment is easily made from the leading edge without the need of extracting the suspension unit
- · Track stop, adjustable retaining force and cover flap
- · Smooth and quiet operation
- Set with a 20 mm $(\frac{25}{32})$ longer hanger bolt is available
- Can be combined with soft closing mechanism SoftMove 80 for HAWA-Junior 80

Variant with a 20mm $(\frac{25}{32})$ longer hanger bolt

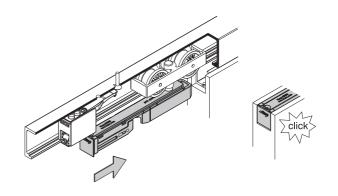

Set no. 24851 allows the running track to be covered from below with removable ceiling elements.

Attention: ceiling elements must be removable.

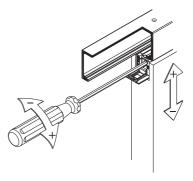

Easy and efficient installation

The suspension trolley comes already fitted with hanger bolt, assembly wedge and cover cap with locking mechanism and is simply clicked into place as a complete unit in the suspension profile.

Height adjustment and fine adjustment

HAWA-Junior 80/B (mod.) accommodates large structural tolerances of up to \pm 7 mm ($\frac{9}{32}"$). Coarse adjustment via the trolley takes up to \pm 3 mm ($\frac{1}{3}$ "). Fine adjustments up to \pm 4 mm ($\frac{5}{32}"$) are made via the adjustment mechanism in the suspension unit.

Simple fine adjustment from the leading edge.

Track stop for HAWA-Junior 80

The new track stop for all HAWA-Junior 80 systems is very easy to install and adjust. Its shape makes jamming during installation impossible. The integrated cover cap discreetly covers the screws after the retaining force has been set.

Adjust retaining force

Planning/installation

For planning and execution please use the installation instructions code 24484 – HAWA-Junior 80/B (mod.) and code 24924 – HAWA-Junior 80/B (mod.) with longer hanger bolt. (\rightarrow www.hawa.ch \rightarrow HAWA-Productfinder)

For convenient operation of sliding doors with soft closing mechanisms, use protruding handles instead of shell handles.

HAWA-Junior hardware may also be used for glass or metal sliding doors. Please request the corresponding documentation.

H A W A -- Notes

Removable, replaceable and extendible at any time!

Wall pocket hardware for sliding doors weighing up to 80 kg (176 lbs.), for low headroom applications.

Description

HAWA-Junior 80/B-Pocket is the new pocket solution for wooden sliding doors weighing up to 80 kg (176 lbs.). Fitting and removing the running track is always possible even in fixed pocket structures thanks to the retainer profile with a bayonet lock. All of the components can be replaced and extended at any time. Furthermore, the high degree of pre-assembly also prevents contamination of the running track during the construction phase.

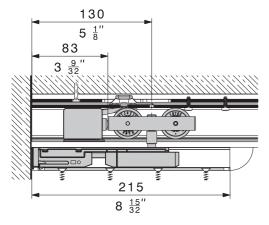

The suspension unit designed specifically for pocket installation, the clip-on cover suitable for concealed mounting, the new rattle-proof floor guide and a door push-out round off the comprehensive HAWA-Junior 80/B-Pocket solution.

Applications

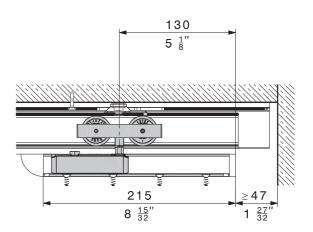

Ideal for optimising room space and making wooden sliding doors easy also disabled users to close, for example in retirement homes, care homes, shopping centres, schools and public buildings, as well as in family homes, apartment complexes and hotels.

Features of the HAWA-Junior 80/B-Pocket

- Maximum door weight 80 kg (176 lbs.)
- Entire door opening width: 700–1500 mm (2'3 9 4'11 1)
- Door thickness: $40-50 \text{ mm} \left(1\frac{19}{32} 1\frac{31}{32}\right)$
- Adjustable vertically $\pm 3 \text{ mm} \left(\frac{1}{8}\right)$, with integrated anti-twist protection
- Horizontal longitudinal adjustment range in the bayonet ± 8 mm ($\frac{5}{16}$ ")
- Suspension with retainer profile and integrated suspension trolley
- Door is easier to slide into the pocket
- The end position can be adjusted via the suspension trolley in the pocket when the door is open
- Rattle-proof running track assembly
- · Laterally adjustable rattle-proof floor-mounted guide
- Separating layer between running track and retainer profile reduces vibration transmission (structure-borne noise)
- Removable running track up to 3 m (9'10¹/₈") even in fixed pocket structures
- Components in the running track can be replaced or added to as required at any time
- Door push-out can be integrated in the running track
- Can be combined with soft closing mechanism SoftMove 80 for HAWA-Junior 80

Door position: closed

Door position: open, inside the pocket

Subject to modification. Metric specifications are exact. Inches are approximate

The pocket solution

HAWA-Junior 80/B-Pocket stands for easier insertion of the door in a pocket:

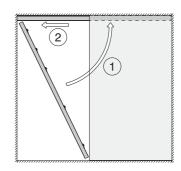

- The pivot point of the suspension unit is at the end of the door on the pocket side
- The suspension unit on the pocket side can be pushed towards the middle of the door during installation
- Easy and efficient height adjustment when the door is installed

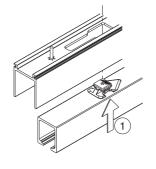

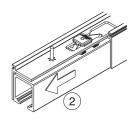

Assembly set

The retainer profile with bayonet lock is pre-assembled and therefore offers the greatest possible protection from running track contamination during the construction phase. The running track can be installed and removed at any time once the pocket is completed, be it to fit or replace additional components.

The rattle-proof bayonet lock with entry ramp makes it easier to install the running track in the retainer profile. The separating layer between the two profiles reduces vibration transmission (structure-borne noise).

Bayonet range: Adjustable in the bayonet: $\pm 8 \text{ mm} \left(\frac{5}{16} \right)$

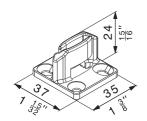

35 mm (1 3 ")

Rattle proof floor guide

The rattle-proof floor guide [groove width 10 mm $(\frac{13^{"}}{8})$ is now 35 mm $(1\frac{3}{8})$ long and laterally adjustable. It enables the door to be pushed into a finished wall pocket.

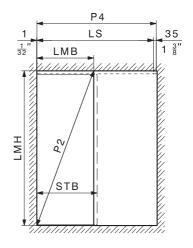

Variant with a 20mm $(\frac{25}{32})$ longer hanger bolt

Set no. 24851 allows the running track to be covered from below with removable ceiling elements.

Lenght of running track

The length of the running track must not exceed the diagonal clearance [P2-80 mm $(3\frac{5}{9}")$].

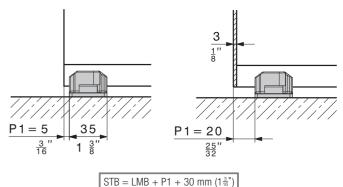

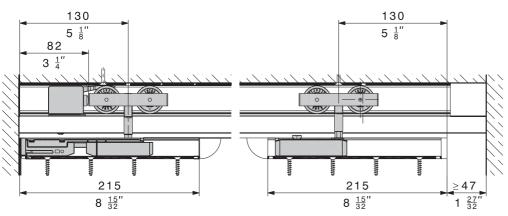

LMB	Entire opening width
LMH	Entire opening hight
STB	Sliding shutter width
P2	Diagonal clearance

Sliding shutter width

The following factors play a role in calculating the width of the sliding door:

- Open or closed guide groove
- Design with or without a door push-out (spring-loaded door stop no. 25370)

			code
	Clip-on cover 2000 mm (6'6\frac{3}{4}") alu plain anodized for lintel mounting for HAWA-Junior 80		25445
	Spring-loaded door stop for door weight up to 80 kg (17 integrated in HAWA-Junior 8		25370
	Track stop, adjustable	1 piece	24497

	Guide, rattle proof, for screw mounting to floor, groove width 10 mm (ﷺ), black plastic, set of 10 pieces		25958

Optional cover for retainer profile

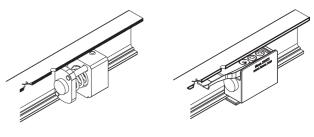

The optionally available aluminum cover simply clips onto the retainer profile with no need for additional fastening components. Installers can attach the clip-on cover to panels with a material thickness of up to 40 mm $(1\frac{19}{2})$ for concealed panel attachment.

Optional door push-out

The specifically developed spring-loaded door stop no. 25370 is integrated in the running track if a door push-out without visible hardware components is desired.

Track stop no. 24497 is recommended for systems without a door push-out.

Spring-loaded door stop no. 25370

Track stop no. 24497

Planning/installation

For planning and installation purposes, please use the installation drawings:

- code 25089 HAWA-Junior 80/B-Pocket, set
- code 25558 Assembly set for running tracks in wall pockets for HAWA-Junior 80

(→ www.hawa.ch → HAWA-Productfinder)

For convenient operation of sliding doors with soft closing mechanisms, use protruding handles instead of shell handles.

→ Caution: Danger of collision with the pocket structure.

Hardware system for simultaneous sliding of 2 to 3 doors weighing up to 80 kg (176 lbs.) or 4 doors weighing up to 40 kg (88 lbs.).

Description

Two or three doors can be moved simultaneously to the left or right when combined with the tried and tested HAWA-Junior 80/Z Technik and the HAWA-Telescopic 80/2 or 80/3 hardware. The version incorporating the HAWA-Telescopic 40/4 allows two sliding doors to be opened simultaneously to the left and to the right.

Features of the HAWA-Telescopic 80/2 - 80/3 - 40/4

- Maximum door weight 80/2, 80/3: 80 kg (176 lbs.)
- Door width 80/2, 80/3: 500–1200 mm (1'7 $\frac{11}{16}$ "–3'11 $\frac{1}{4}$ ")
- Door thickness 80/3: $40-47 \text{ mm } (1\frac{32}{32})^{-1} (1\frac{32}{32})^{-1}$
- Maximum door weight 40/4: 40 kg (88 lbs.)
- Door width 40/4: 500–800 mm (1'7 $\frac{11}{16}$ "–2'7 $\frac{1}{2}$ ") Door thickness 40/4: 40–47 mm (1 $\frac{197}{32}$ "–1 $\frac{27}{32}$ ")
- Offers all the quality benefits of HAWA-Junior 80/Z products
- Telescopic opening of two to three sliding doors
- Symmetrical opening of four sliding doors
- · Allows large openings
- Fibreglass-reinforced toothed belts guarantee high tensile strength and a low level of expansion

Rattle proof floor guide for wall pocket

The rattle-proof floor guide [groove width 10 mm $(\frac{13}{32})$ is now 35 mm $(1\frac{3}{8})$ long and laterally adjustable. It enables the door to be pushed into a finished wall pocket.

The following factors play a role in calculating the width of the sliding door:

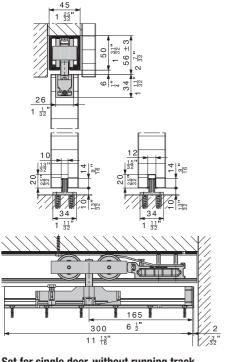

- Open or closed guide groove
- Design with or without a door push-out (spring-loaded door stop no. 27200)

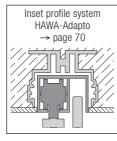

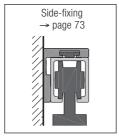

Planning/installation

For planning and execution please use the installation instructions code 17689. (\rightarrow www.hawa.ch \rightarrow HAWA-Productfinder)

HAWA-Junior hardware may also be used for glass sliding doors. Please request the corresponding documentation.

Rattle proof floor guide for wall pocket

The rattle-proof floor guide [groove width 10 mm ($\frac{13}{32}$ ") is now 35 mm $(1\frac{3}{8}")$ long and laterally adjustable. It enables the door to be pushed into a finished wall pocket.

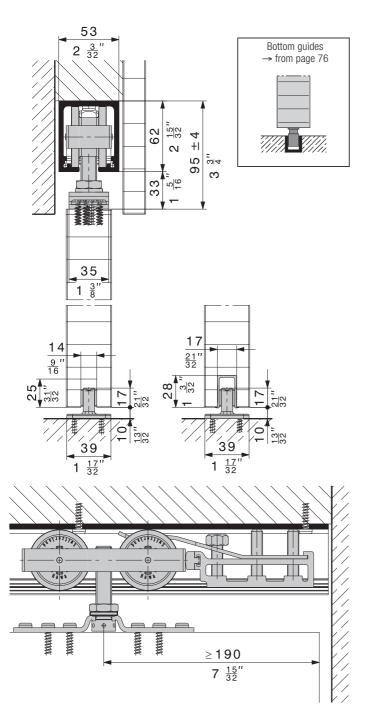

The following factors play a role in calculating the width of the sliding door:

- Open or closed guide groove
- Design with or without a door push-out (spring-loaded door stop no. 27200)

Planning/installation

For planning and execution please use the installation instructions code 17689. (→ www.hawa.ch → HAWA-Productfinder) HAWA-Junior hardware may also be used for glass sliding doors. Please request the corresponding documentation.

Hardware system for sliding doors weighing up to 160 kg (352 lbs.).

Description

The HAWA-Junior 160/A is a hardware system with bracket suspension for wooden and metal doors weighing up to 160 kg (352 lbs.).

Features of the HAWA-Junior 160/A

- Galvanized steel top fixing plate for bolting or welding
- Robust
- · Light and silent action
- Vertically $[\pm 4 \text{ mm } (\frac{5}{32})]$ and laterally adjustable
- Track stop, adjustable retaining force

Set for single sliding door, without running track

	code
HAWA-Junior 160/A	11703

For frameless, full room-height sliding doors.

Hardware system with patch-fitting floor guides for wooden and/or glass sliding doors weighing up to 70 kg (154 lbs.).

Description

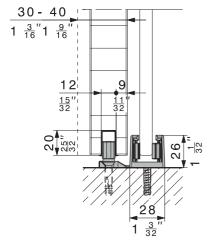

A fit-anywhere, frameless sliding hardware system for wooden and glass sliding doors weighing up to 70 kg (154 lbs.). Ideal not only for walk-in closets, but also for room-height and flexible partitions in residential and office settings. The possibility of combining glass and wood sliding doors gives new freedom to architects and installers. Patch-fitting, rattle-proof floor guides are available for all wood and/or glass combinations. HAWA-Ordena 70/P has also been designed with problem-free retrofitting in mind.

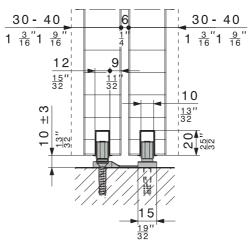

Applications

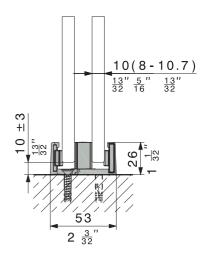

Everywhere that variable space utilisation and unrestricted access should leave a tidy impression, e.g. walk-in closets for office and residential settings, and as a partition or aesthetic room divider in hotels, restaurants, hospitals, schools, offices, and private residential interiors.

Features of the HAWA-Ordena 70/P

- Top-running sliding system, impervious to dust and dirt
- · Possibility to combine wood and glass sliding doors
- Patch-fitting, rattle proof floor guide
- Frameless and easy to install
- Maximum door weight 70 kg (154 lbs.)
- Maximum door height 2600 mm (8'63")
- Minimum door width 600 mm (1'11 $\frac{5}{8}$ '
- Door thickness, wood 30-40 mm (1³/₁₆"-1¹⁹/₃₂")
- Door thickness, glass: ESG (fully tempered monolithic glass): 8/10 mm ($\frac{5}{16}$ "/ $\frac{13}{32}$ ") VSG (fully tempered laminated glass): 8,7–10,7 mm ($\frac{11}{32}$ " $\frac{7}{16}$ ")
- 2-8 mm $\left(\frac{3}{32} \frac{5}{16}\right)$ minimum clearance between the running track and the top edge of the sliding door
- Glass doors use popular HAWA-Junior GP suspensions

 Full room-height with frameless guides.

Hardware system with continuous bottom guide profile for wooden and/or glass sliding doors weighing up to 70 kg (154 lbs.).

Description

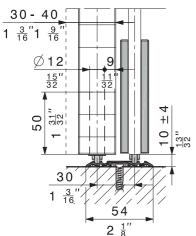

A fit-anywhere, frameless sliding hardware system for wooden and/or glass sliding doors weighing up to 70 kg (154lbs.). Ideal not only for walk-in closets, but also for room-height and flexible partitions in residential and office settings. The possibility of combining glass and wood sliding doors gives new freedom to architects and installers. The combination of a surface mounted continuous bottom guide profile and spring loaded floor guides easily accommodates differences in floor-to-ceiling height and permits any combination of wood and/or glass. HAWA-Ordena 70/F has also been designed with problem-free retrofitting in mind.

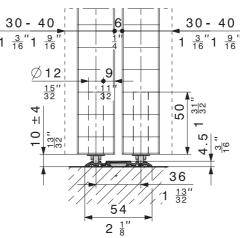

Applications

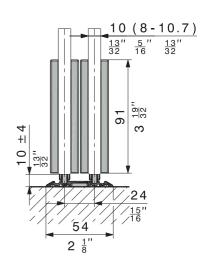

Everywhere that variable space utilisation and unrestricted access should leave a tidy impression, e.g. walk-in closets for office and residential settings, and as a partition or aesthetic room divider in hotels, restaurants, hospitals, schools, offices and private residential interiors.

Features of the HAWA-Ordena 70/F

- Top-running sliding system, impervious to dust and dirt
- Possibility to combine wood and glass sliding doors
- Wide doors are kept firmly on track by two spring loaded floor guides
- Clip or stick-on 4,5 mm (13/1) high floor guide track
- Frameless and easy to install
- Doors can slide across the entire opening width
- Centre stop to hold sliding doors in position
- Maximum door weight 70 kg (154 lbs.)
- Maximum door height 2600 mm (8'6 3 ")
- Minimum door width 600 mm (1'11⁵/₈")
- Door thickness, wood 30–40 mm ($\overset{\circ}{1}\frac{\overset{\circ}{3}}{\overset{\circ}{16}}$ "-1 $\frac{19}{32}$ ")
- Door thickness, glass:
 ESG (fully tempered monolithic glass): 8/10 mm (⁵/₁₆"/¹³/₃₂")
 VSG (fully tempered laminated glass): 8,7–10,7 mm (¹¹/₃₂" ⁷/₁₆")
- 2-8 mm (³/₃₂"-⁵/₁₆") minimum clearance between the running track and the top edge of the sliding doors

Hardware system for sliding doors weighing up to 150 kg (330 lbs.).

For low headroom applications.

Description

The HAWA-Silenta 150/B is a highly reliable hardware system which is characterised by a low installation height, quiet operation and extreme strength.

Features of the HAWA-Silenta 150/B

- Low headroom applications 55 mm (2 11 1 64)
- Plastic-tyred ball bearing wheels
- Track stop, adjustable retaining force
- Lateral fixing of trolleys for sliding doors running in the ceiling
- Vertically adjustable $\pm 5 \text{ mm } (\frac{7}{32}")$

Flush partition walls with flexible folding.

Hardware system for large wooden folding walls with panel weighing up to 80 kg (176 lbs.).

Description

HAWA-Variofold 80/H is a hardware system for wooden folding walls with up to 80 kg (176lbs.) heavy panels. Installations are simple to plan, and quick to assemble. A pivot bearing secures the first panel in the set; the others line by means of elegant, stainless steel hinges that bring the panels closer together and minimise panel stacking space requirements. The panel set and the opposing end may also have a pivot door fitted. Attached to every other panel is a folding-/pivot door catch with an integrated, individually adjustable retainer, to hold the folding wall flush when closed.

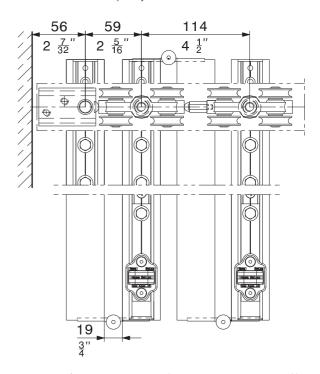

With HAWA-Variofold 80/H, panels are quided in a bottom guide channel. Installations with two panels on either side and up to 3,6 m (11'9 $\frac{3}{4}$ ") wide are also possible without a bottom guide channel. A bar bolt lock operated at handle height keeps out unwanted visitors. Alternatively, an unobtrusive deadbolt lock fitted to the bottom edge of the panel provides almost invisible locking.

Applications

Any situation where a simply operated, high-quality folding system is needed to partition a room. Equally suitabel for residential and commercial settings, e.g. shopping centres, airports, hotels, restaurants and banks. 2-piece thoroughfare doors in place of conventional hinged doors are most convenient in living space designed for handicapped people.

Features of the HAWA-Variofold 80/H

- Minimum panel width 500 mm (1'7¹¹/₁₆")
- Maximum panel width 900 mm (2'11 ⁷/₁₆")
- Panel thickness 35-45 mm $\left(1\frac{3}{8}\right)^{-1}-1\frac{25}{32}\right)^{-1}$ [Panel thickness 46-57 mm $\left(1\frac{13}{16}\right)^{-2}-2\frac{1}{4}$ available on special request]
- Maximum panel weight 80 kg (176 lbs.)
- Left and right-hand, inwards or outwards-opening installations all use the same components
- A communicating pivot door can be added to the panel stack, or the opposing end
- Equal-width panels for simple planning
- Vertical adjustment ± 3 mm (¹/₈")
- · Light and quiet running
- · Panel stack stores compactly

Partial sets without hinges, running track and bottom guide channel

Hinge

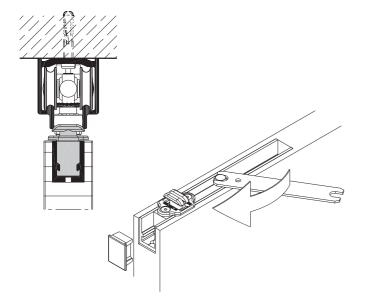

Hollow seal

		code
Hollow seal, rubber black	Roll of 10 m (32'9")	19657

Folding-/pivot door catch

Every other panel has a folding-/pivot door catch (20426). Panels can thus be held flush in position without operating a locking mechanism.

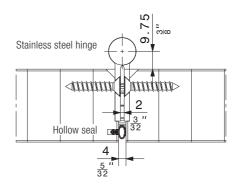

Hinge

High loadbearing capacity means that panels up to 2500 mm (8'2 $\frac{7}{16}$ ") tall require just two hinges.

Hinge positions

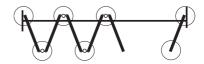

Hollow seal

Hollow cross-section seal strips eliminate the problem of light penetrating through gaps between panels.

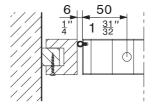

Hollow seal positions

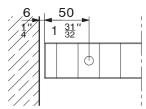

Wall attachment

Hawa AG recommends a compensation strip for optimum wall attachment. In combination with hollow seal code 19657, this results in the elimination of the light gap and reduces draughts to a minimum. Doors that close directly against the wall must have 6 mm $(\frac{1}{4})$ clearance.

Version A With premises-fitted compensation strip and hollow seal code 19657

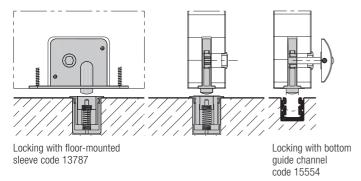

Version B Direct wall attachment requires 6 mm $\binom{1}{4}$ ") clearance

Bar bolt lock

Bar bolt lock code 19592 allows locking the folding wall at handle height.

Centerfold 80/H

Flush folding partition walls without a bottom guide channel.

Hardware system for large wooden centre fold walls with panel weighing up to 80 kg (176 lbs.).

Description

HAWA-Centerfold 80/H is a hardware system for wooden centre fold walls with up to 80 kg (176 lbs.) heavy panels. Installations are simple to plan, and quick to assemble. A pivot bearing secures the first panel in the set; the others line up with the help of elegant, stainless steel hinges that bring the panels closer together and minimise the panel stacking space required, the panel set and the opposing end may also have a pivot door fitted. Attached to every other panel is a folding-/ pivot door catch with an integrated, individually adjustable retainer, to hold the centre fold wall flush when closed.

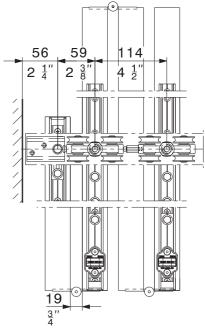

Mid-point panel suspension means that HAWA-Centerfold 80/H installations do not require a bottom guide channel. A bar bolt lock operated at handle height keeps out unwanted visitors. Alternatively, an unobtrusive deadbolt fitted to the bottom edge of the panel provides almost invisible locking. Both locks engage with floor inserts, or a locking plate.

Applications

Any situation where a simply operated, high-quality folding system is needed to partition a room. Equally suitable for residential and commercial settings, e.g. shopping centres, airports, hotels, restaurants and banks. $1\frac{1}{2}$ -piece thoroughfare doors in place of conventional hinged doors are most convenient in living space designed for handicapped people.

Features of the HAWA-Centerfold 80/H

- Minimum panel width 500 mm (1'7¹¹/₁₆")
- Maximum panel width 900 mm (2'11 7 ")
- Panel thickness 35-45 mm $\left(1\frac{3}{8}"-1\frac{25}{32}"\right)$ [Panel thickness 46-57 mm $\left(1\frac{13}{16}"-2\frac{1}{4}"\right)$ available on special request]
- Maximum panel weight 80 kg (176 lbs.)
- No bottom guide channel
- Left and right-hand, inwards or outwards-opening installations all use the same components
- A communicating pivot door can be added to the panel stack, or the opposing end
- Vertical adjustment ± 3 mm (¹/₈")
- · Light and guiet running
- Panel stack stores compactly

Subject to modification. Metric specifications are exact. Inches are approximate.

Locks

Additional deadbolt or bar bolt locks may be fitted for safety and to keep out unwanted visitors.

Locking from the inside engages the floor-mounted sleeve code 13787. Mortice locks can be used to secure pivot doors.

Bar bolt lock

Bar bolt lock code 19592 allows locking the folding wall at handle height.

$H \quad A \quad W \quad A \quad - 20-c \quad Folding \quad wall \quad 120$

Hardware system for room division applications for panel weights up to 120 kg (264 lbs.).

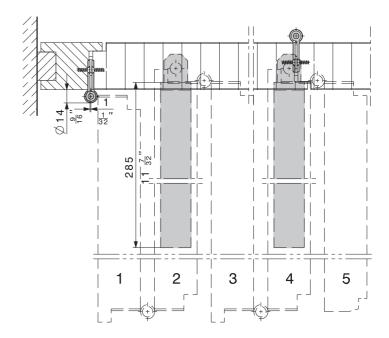

Description

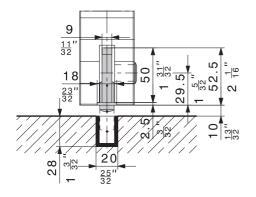

In the event of an odd number of panels, the last panel can be designed as a communicating door. A stop can be provided on top if desired. When open, the panels are at an angle of 90° to the closed partition. The panel stacks may be arranged on the right- and/or left-hand side. Within a panel stack, the panels are hinged together. Starting from the first panel (which is hinged to the frame), every second panel is suspended at its side edge. This calls for a floor guide. To fix non-guided panels, a bar bolt lock is placed at the end of panels 1, 3, 5, etc. When the partition is closed, the panels are secured into the bottom guide channel.

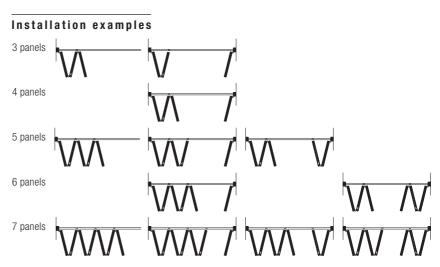

The first panels should be made slightly narrower in precise ratio to the other panels. The width of the first panel hinged at the rear (1) is not identical to that of the following panels.

Features of the HAWA 20-c Folding wall 120

- Hardware system for room division applications
- Max panel weight: 120 kg (264 lbs.)
- Max panel width: 1000 mm (3'3\frac{3}{8}")
- Special trolley as supplementary component for fire doors
- Adjustable vertically $\pm 2 \text{ mm } (\frac{3}{32})$

2 panels

Hardware system for folding a pair of panels, panel weight up to 40 kg (88 lbs.), or two to three pairs of panels, panel weight up to 30 kg (66 lbs.).

Description

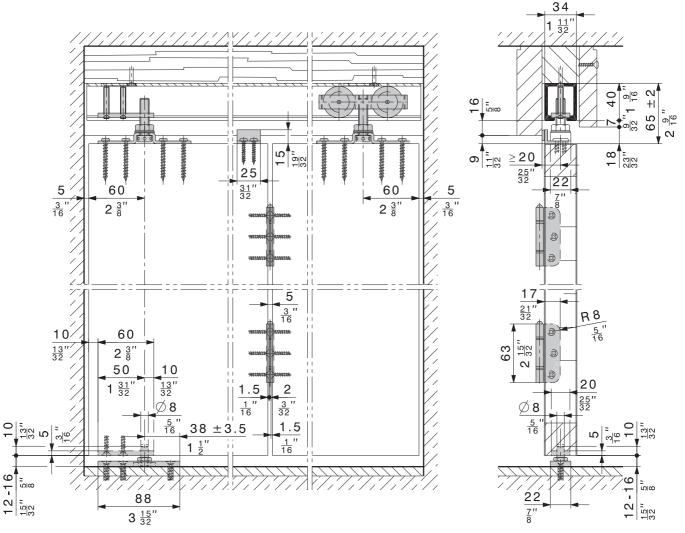

The HAWA-Bifold 30 is a folding hardware system comprising the components of our HAWA-Junior 80 family. It permits the installation of 1, 2 or 3 pairs of door panels. Two-door constructions can be installed without bottom guide channels, though these are required for four and six-door version. Hardware sets can be used for installations that fold to the left and the right.

Applications

For use wherever doors with a weight up to 30 kg (66 lbs.) and a width of 600 mm (1'11 $\frac{5}{8}$ ") per panel, need to be folded to save space, e.g. in hotel rooms, offices, kitchens and corridors.

Features of the HAWA-Bifold 30

- 2 panels: Maximum panel weight, 40 kg (88 lbs.), or 80 kg (176 lbs.) per panel pair
- 4 and 6 panels: Maximum panel weight, 30 kg (66 lbs.), or 60 kg (132 lbs.) per panel pair
- Maximum panel width, 600 mm (1'11⁵/₈"), or 1200 mm (3'11¹/₄"), per panel pair
- Door thicknesses, $26-45 \text{ mm} \left(1\frac{1}{32} 1\frac{49}{64}\right)$

Hardware system for stackable wooden partitions up to 60 kg (132 lbs.)

Description

The first system on the market purpose-designed for lightweight wooden partition walls up to 60 kg (132 lbs.) per panel combines high quality with an economical price. It offers a particularly attractive architectural solution because the closed partition is perfectly flush, and requires only a small stacking area when opened. With the comprehensive assembly instructions, craftsmen can plan and fit simple installations by themselves. Furthermore, HAWA Aperto 60/H is a standardised system with a very simple component structure, which ensures rapid delivery of all parts from stock.

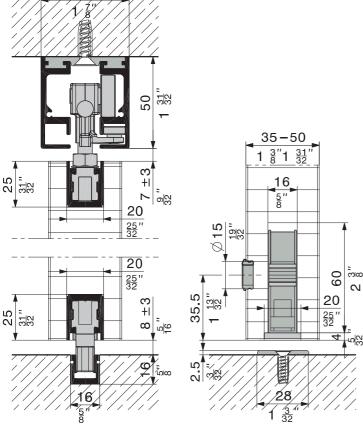

Maximum ease of operation is attained using a bottom guide channel. Installations without a bottom guide channel are also possible at lower panel weights and careful operating.

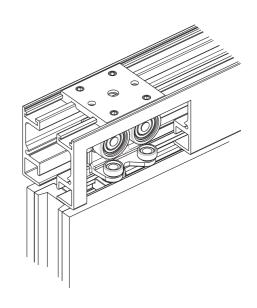

Applications

Wherever rooms require individual design or repurposing. Thank to minimal fitting dimensions, modest stacking area space requirements and its attractive price, HAWA-Aperto 60/H opens completely new possibilities. It can be used for room dividers and screens in a wide range of scenarios. Partitions that reach from a counter-top to the ceiling, for example, are also easier and less costly to build.

Features of the HAWA-Aperto 60/H

- Maximum panel weight 60 kg (132 lbs.)
- Panel thickness 35-50 mm (1 ³/₈"-1 ³¹/₃₂")
- Minimum panel width for standard installations 550 mm (1'9^{21"}/₃₂)
- Maximum panel width for standard installations:
 - stacking 90° to the slide axis, 950 mm (3'1 $\frac{13"}{32}$)
 - stacking parallel to the slide axis, 1500 mm (4'11¹/₁₆")
- Maximum panel height 2600 mm (8'6³/₈")
- Adjustable vertically ± 3 mm (¹/₈")
- Centre stop with progressively adjustable retention spring catch
- · Comprehensive planning and assembly instructions
- Stacking area accommodates up to 9 door panels
- Stacking at 90° and parallel to the sliding axis
- A single lock secures the entire installation
- Installations without a floor track are possible for lower panel weights
- Running tracks and bottom guide channels: alu plain anodized

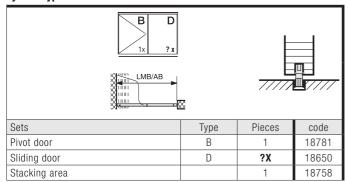

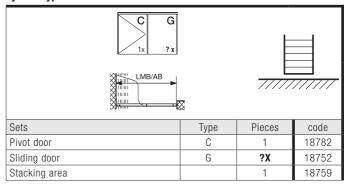

Stacking area options

With HAWA-Aperto 60/H, lightweight wooden partitions tuck away invisibly behind a wall or pivot door. Door panels can stack both at 90° and parallel to the sliding axis.

Hardware system of modular design for stackable wooden partitions up to 100 and 150 kg (220 and 330 lbs.) per panel.

Description

Thanks to the modular track system and its unrivalled cornering technique, HAWA-Variotec 150/H enables the quick realization of all design concepts for room partitions. This hardware system allows straight running tracks/bottom guide channels and curved segments of 15, 30, 45, 60, 75 and 90 degrees to be combined to form customized configurations. Different trolleys are required depending on the door weight (100 or 150 kg / 220 or 330 lbs.).

Test certificates of the Landesgewerbeanstalt Bayern (LGA) in Nuremberg confirm the hardware system's high functionality and resistance to wear.

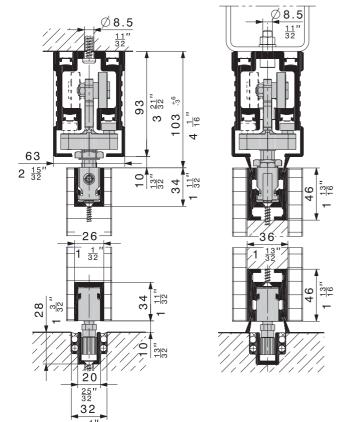

In principle, a version without bottom guide channels is possible. However, we recommend using them since this makes opening and closing the partitions more convenient.

Applications

This hardware system is suitable for use wherever high quality and quiet operation are called for, e.g. in hotels, restaurants, banks, openplan offices and exclusive interior designs.

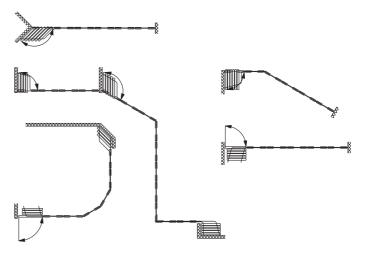

Features of the HAWA-Variotec 150/H

- Modular system
- Trolley with two-point guide
- Progressively adjustable height +6/-3 mm ($+\frac{15}{64}$ "/ $\frac{1}{8}$ ")
- Extremely light and smooth cornering
- Minimum axis radius 4000 mm (13'1¹/₂")
- Maximum sliding door weight 150 kg (330 lbs.)
- Secure locking
- Small space requirement in stacking area

Layout examples

The layout examples shown below demonstrate the many varied and creative application possibilities of the HAWA-Variotec 150/H hardware system.

Planning/installation

For planning and installation purposes, please use the installation drawing code 21718 (parallel) or 21719 (90°) (→ www.hawa.ch → HAWA-Productfinder)

H A W A - Vertical 150

Hardware system for vertically sliding windows weighing up to 150 kg (330 lbs.).

Description

Each sliding panel is guided laterally in plastic tracks and is equipped with a counterweight which moves on one side behind the window jamb. The counterweight has to be supplied by a contractor to suit the panel weight, and the panel is locked using a standard central locking device.

The cable length of 8 m (26'2 $\frac{61}{64}")$ is designed for the following dimensions:

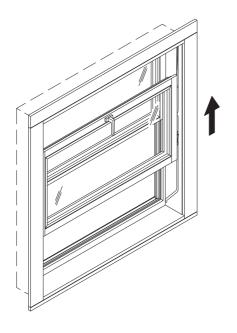

Window height up to 900 mm (2'11 $\frac{7}{16}$ "), maximum window width 3200 mm (10'6") or window height up to 1200 mm (3'11 $\frac{1}{4}$ "), maximum window width 2000 mm (6'6 $\frac{3}{4}$ "). For larger panels, the cable must be ordered separately. (\rightarrow calculation for the cable length)

Features of the HAWA-Vertical 150

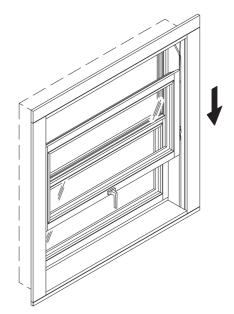

- One sliding panel
- White, black or brown plastic guide profiles
- Smooth sliding properties
- Maintenance-free
- Mortising of guide channel with all-purpose mortising template
- Standard window and frame rebates

Ventilation

To permit additional ventilation, the upper panel (HAWA-Vertical 150/3) can be fitted with a standard tilting window mechanism.

HAWA-Vertical 150/5

Drilling jig for edge fixed guide bracket		12909	

The hardware system components are supplied for a maximum window height of 1200 mm (3'11 $\frac{1}{4}$ "). To accommodate panels of a greater height, additional guide channels have to be ordered: 10566/600 mm (1'11 $\frac{6}{5}$ ") brown, 17140/600 mm (1'11 $\frac{6}{5}$ ") black, or 10580/600 mm (1'11 $\frac{6}{5}$ "), white.

Calculation for the cable length

Length of cable = $2 \times H + 1 \times W + 1000 \text{ mm} (3'3\frac{3}{8}")$

Order specifications

Order specifications for panels larger than 900 mm x 3200 mm (2'11 $\frac{7}{16}$ " x 10'6"), or 1200 mm x 2000 mm (3'11 $\frac{1}{4}$ " x 6'6 $\frac{3}{4}$ "):

- Height of sliding panel
- Jamb inside dimension
- Quantity of hardware sets
- Quantity and type of guide channels
- · Quantity and type of accessories

Planning/installation

For planning and installation purposes, please use the installation drawing code 20463. (\rightarrow www.hawa.ch \rightarrow HAWA-Productfinder)

Transport system for loads up to 40 kg (88 lbs.) per trolley.

Description

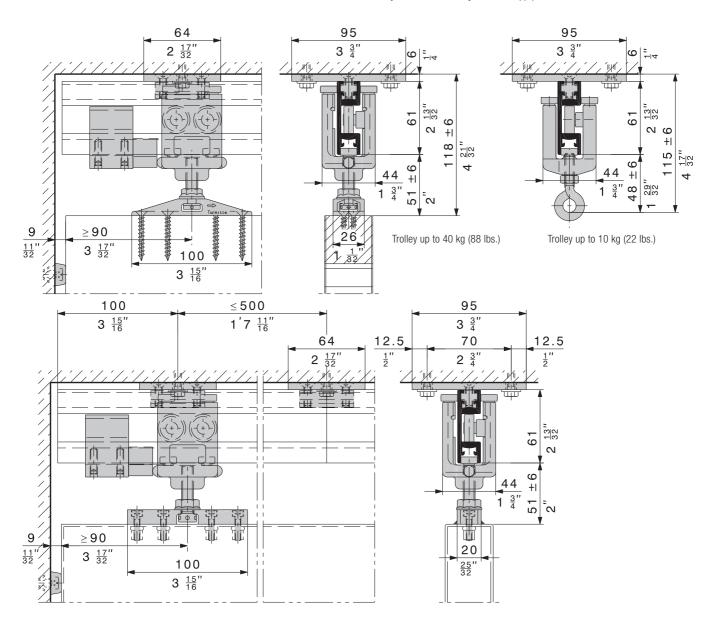

The HAWA-Varioflex 40/TS is a hardware system with outstanding cornering properties. The plug-in track system with straight sections and curved rails of 15, 30, 45, 60, 75 and 90 degrees permits complete freedom with regard to construction. Rail joints are linked simply and precisely by means of coupling elements on both sides.

Applications

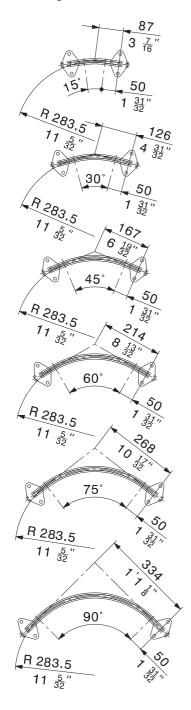

Map boards, projection walls, work stations with electrical cables and compressed air hoses. Storage and display of articles in shops, snowboards e.g.

Features of the HAWA-Varioflex 40/TS

- Modular system
- Trolley for loads up to 40 kg (88 lbs.) with 2 suspension wheels and 6 guide rollers
- Trolley for loads up to 10 kg (22 lbs.) with 2 suspension wheels and 4 guide rollers
- · Outstandingly smooth cornering
- Adjustable vertically ± 6 mm (¹/₄")

Curve running tracks

Installation

When assembling the running track, a top fixing plate must be attached every 500 mm (1'7 $\frac{11}{16}$ ")

Order specifications

- Length of running track
- Quantity and type of curve running track
- Quantity of top-fixing plate
- Quantity of coupler to running track
- Quantity of running track cover cap sets
- Quantity and type of components

SoftMove soft closing mechanism for Hawa-Junior

Description

The SoftMove 40-80-120 soft closing mechanism is an accessory for all HAWA-Junior 40-80-120 systems and therefore suitable for both wood and glass sliding doors. It can be installed on the opening or closing side. Completely integrated into the running track, the SoftMove gently decelerates sliding doors and draws them into their final position.

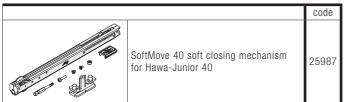

Features of the SoftMove 40-80-120 soft closing mechanism

- Utilisable with all Hawa-Junior systems within this weight class
- Quick and easy installation
- Continuous gentle deceleration and closing with no door spring-back
- High-class hydraulic damper
- · Very user-friendly thanks to minimal noise development
- Invisibly integrated in the running track
- Long-lasting and maintenance-free materials
- For convenient operation of sliding doors with soft closing mechanisms, use D handles instead of shell handles

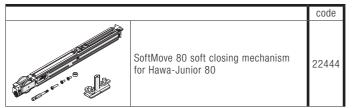

Note

In combination with the assembly set, the planning section of the assembly set and SoftMove soft closing mechanism installation instructions must be taken into consideration before ordering the running track.

Glass HAWA-Junior 40 GP HAWA-Junior 40 GS HAWA-Junior 40 GL

Removable, replaceable and extendible at any time!

Assembly set

The retainer profile with bayonet lock is pre-assembled and therefore offers the greatest possible protection from running track contamination during the construction phase. The running track can be installed and removed at any time once the pocket is completed, be it to fit or replace additional components.

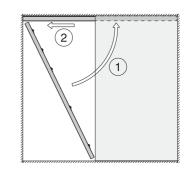

The rattle-proof bayonet lock with entry ramp makes it easier to install the running track in the retainer profile. The separating layer between the two profiles reduces vibration transmission (structure-borne noise).

Features of the assembly set

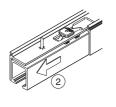

- removable running track even in fixed pocket structures
- Components in the running track can be replaced or added to as required at any time
- Furthermore, the high degree of pre-assembly also prevents contamination of the running track during the construction phase.
- Horizontal longitudinal adjustment range in the bayonet ± 8 mm
- Rattle-proof running track assembly
- Separating layer between running track and retainer profile reduces vibration transmission (structure-borne noise)
- Clip-on cover for concealed attachment of the lintel panelling up to a material thickness of 40 mm

Note

In combination with the SoftMove soft closing mechanism, the planning section of the SoftMove and assembly set installation instructions must be taken into consideration before ordering the running track.

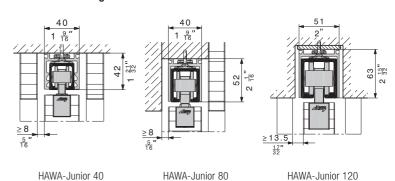

Bayonet range: 35 mmAdjustable in the bayonet: $\pm 8 \text{ mm}$

Let HAWA-Junior 80 and 120 running tracks

Description

It is easy and economic to set the HAWA-Adapto 80-120 system in concrete, integrating it into the building shell and so allowing running tracks for HAWA-Junior 80 and 120 to be fitted flush with the ceiling, whether with or without a profile for fixed glass. This puts an end to troublesome drilling in concrete ceilings, making damaged circuits and pipelines a thing of the past.

Features of the HAWA-Adapto 80-120

- ceiling-flush fitting of HAWA-Junior running tracks for wooden and glass sliding doors up to 80 and 120 kg (176/264 lbs.)
- economic assembly in the building shell
- frontal cover caps and a polystyrene insert prevent concrete from penetrating the system
- running tracks do not require a faceplate
- further profiles allow fixed glass to be fitted without hardware being visible
- quick and easy track levelling thanks to special adjusting screws and pre-defined spacing plates

Please observe when designing

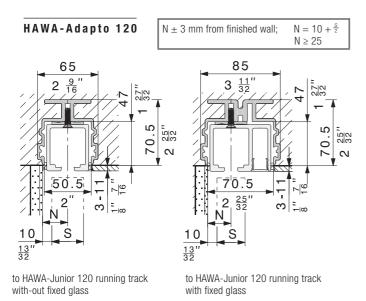

When designing your system, please take into account wall structure, ceiling layers, and exposed elements such as switches, skirting boards, etc. The HAWA-Adapto profile must be fitted exactly to the shuttering.

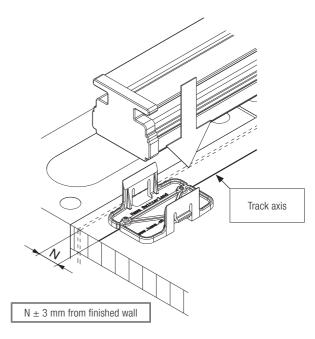

For planning and installation purposes, please use the installation drawing code 19563. (→ www.hawa.ch → HAWA-Productfinder)

Economic assembly in the building shell

The HAWA-Adapto Profile can be integrated in the building shell easily and exactly using the accessories provided:

- 1. Plot running track axis on the sheeting.
- 2. Nail plastic mounting clips to the concrete sheeting.
- 3. Fit frontal cover caps and polystyrene insert to HAWA-Adapto profile and press onto the mounting clips.
- 4. Pour concrete. Done.

The team: HAWA-Adapto and HAWA-Junior

HAWA-Adapto was designed for the following glass and wood sliding systems:

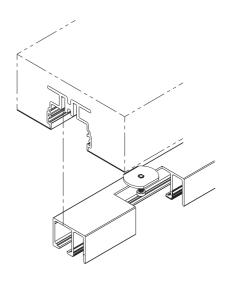

- HAWA-Junior 80-120/GP
- HAWA-Junior 80/GL
- HAWA-Junior 80-120/G
- HAWA-Junior 80-120/B

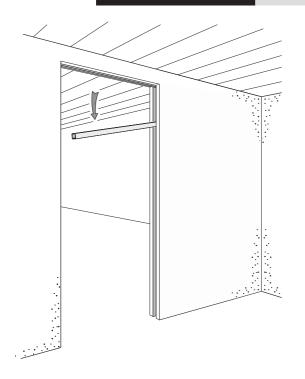

Easy installation of HAWA - Junior running tracks

The HAWA-Adapto profile has a screw duct. HAWA-Junior running tracks both with and without retainers for fixed glass can be attached via the screw duct with special adjustable screws.

Dimensional differences in the structure can be quickly and effectively levelled out by inserting spacing plates at the track ends, with additional plates in the centre for lengths of more than 4 m (13'1 $\frac{1}{2}$ ").

For planning and installation purposes, please use the installation drawing code 19564. (→ www.hawa.ch → HAWA-Productfinder)

Running track fastening to HAWA-Junior 40-80-120

About the product

Allows dismantling running track of fix mounted pocket structures. Ideal for narrow door clearance width.

Features of the running track fastening

- removable running track even in fixed pocket structures 40-80-120
- minimal door clearance width: 700 mm (2'3 9")
- Can be combined with HAWA-Adapto 80-120

Side-fixing angled profile HAWA-Junior 40/80/120 wood.

Description

The clever wall mounting with the new angle profile for HAWA-Junior tracks, door weight up to 120 kg (264 lbs.).

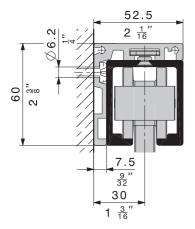

Features of the side-fixing angled profile

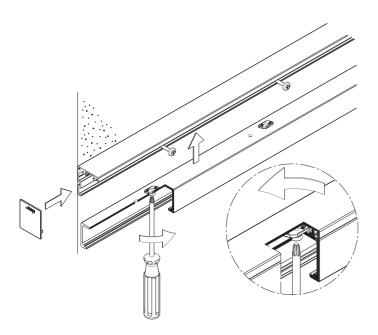

- Permits top-quality design without cover-blinds
- Groove nuts clamp tracks rapidly and simply
- Convenient levelling thanks to continuous angle profile
- High quality cover caps made of metal to angled profile 80/120 which can be mounted on the left and right.
- Angled profiles 80/120 can be individually extendible in length by means of connecting pins.

Hanging and removing sliding doors without dismantling the door lining and cover

For construction purposes, please note the following points:

- A removable 100 mm (3 $\frac{5}{16}$ ") wide stop strip must be attached on the lock side.
- The sliding door should not reach more than 5 mm (⁷/₃₂") into the top or door lining.
- When closed, the sliding door should not stand more than 50 mm (133") behind the covering panel.

Top-running sliding door constructions

For construction purposes, please note the following points:

 Constructions of this type are often installed without a covering panel. If a covering panel is to be installed, this must either be removable, or else a removable 100 mm (3 ⁵/₁₆") wide stop strip must be attached on the lock side.

HAWA-Assembly wedge

Description

HAWA-Assembly wedge for end-fixing of sliding doors running in the ceiling. The HAWA-Assembly wedge opens up new design possibilities. This accessory permits constructions in which a sliding door runs in the top and makes it possible to hang and remove sliding doors without dismantling the door lining and cover.

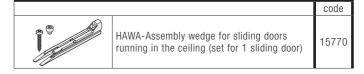

It can be used with the following hardware sets:

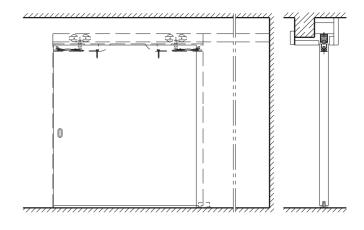

- HAWA-Junior 80/G
- HAWA-Junior 120/B, 120/G
- HAWA-Silenta 150/B
- HAWA-Junior 250/B, 250/G

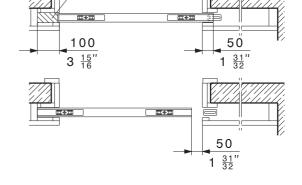

Applications

For sliding doors in elegant interiors, e.g. hotels, offices, industrial and administration buildings and apartments.

HAWA-Assembly wedge

removable

H A W A -- Notes

H A W A -- Notes

H A W A -- General Terms and Conditions (GTC)

1. General information

- 1.1 These General Terms and Conditions apply to all contractual arrangements entered into with Hawa Sliding Solutions AG, Mettmenstetten, Switzerland (Hawa), and they constitute an integral element of these contractual arrangements. Hawa does not recognize contractual partners' contrary or alternative terms and conditions.
- 1.2 In order to be valid, all agreements made between the contractual parties must be made in writing, especially in the case of any deviations from these General Terms and Conditions.
- 1.3 Third parties not party to the contract shall have no entitlement to the assertion of any provisions whatsoever of these General Terms and Conditions.
- 1.4 If any individual provisions contained in these General Terms and Conditions are deemed by a competent authority to be wholly or partially invalid or unenforceable, this shall not affect the remaining provisions or the remainder of the questionable provisions of these General Terms and Conditions.

2. Deliveries

- 2.1 Purchase orders shall only be binding on Hawa, if it has confirmed these in writing. If no specific time or date has been agreed for the delivery of supplies and services, Hawa shall deliver these in accordance with its standard business operations.
- 2.2 In the event of any ambiguities or disagreements concerning the content of a purchase order, Hawa's written order confirmation shall be authoritative, unless the contractual partner has raised an objection to the order confirmation within 24 hours (Monday-Friday), (this time limit shall be correspondingly extended if it expires on a weekend).
- 2.3 Hawa shall only be bound by dates and time limits for the delivery of supplies and services, if these have been defined in writing and confirmed by Hawa in a binding manner. Hawa's fulfilment of dates and time limits is conditional on the timely receipt of all the documents and releases required from the contractual partner and the fulfilment of all its other obligations. Dates and time limits shall otherwise be appropriately extended.
- 2.4 In the event that Hawa fails to meet confirmed dates and time limits, the contractual partner must afford it a reasonable additional period of time to deliver performance. If Hawa also fails to render delivery within this additional period of time, the contractual partner shall be entitled to rescind the agreement and demand the repayment of all payments already made. The contractual partner shall have no fartherreaching rights or claims, especially not to any compensation for delayed performance, or for indirect or third-party damage.
- 2.5 Hawa is entitled to make partial deliveries. In the event that the contractual partner is in default of payment, Hawa shall be entitled to withhold other agreed supplies and services, until all outstanding payments have been settled, and adequate collateral has been provided in respect of future supplies and services. The contractual partner has no right of rescission in the event that a delivery is withheld due to a default of payment.
- 2.6 Subject to any alternative agreement concluded between the contractual parties, deliveries shall be made ex Hawa's warehouse at the cost and risk of the contractual partner (see too No. 3.2). Return consignments of goods require the explicit, prior consent of Hawa. In this case, there will be a credit up to a maximum of 65% of the product value. The contractual partner shall bear the costs of shipment and processing of return consignments (incoming goods inspection, including packaging, etc.). Custom-made products may not be returned.
- 2.7 Unless agreed otherwise with the contracting partner, the delivery terms shall be interpreted in accordance with Incoterms 2010 (International Commercial Terms), of the International Chamber of Commerce (ICC).

3. Prices and conditions of payment

- 3.1 Agreements concerning prices, cash discounts and rebates, etc. shall only be binding on Hawa if agreed in writing. Otherwise the prices contained in Hawa's current price list or order confirmations shall apply. Hawa may amend these price lists at any time. The current price lists shall apply. Prices are listed in Swiss Francs (excluding VAT), unless otherwise explicitly agreed in writing.
- 3.2 Hawa reserves the right to pass on freight charges. The full freight or postage charge will be invoiced for express, postal or direct consignments. All taxes and charges will be passed on. Hawa reserves the right to charge packaging at cost price. Any requests for special packaging shall be charged separately.
- 3.3 Payment is deemed made, once the relevant amount is credited to Hawa's account. In the event of a default of payment, Hawa shall be entitled, without having to issue a reminder, to charge interest from the 31st day following the invoice date, at the rate charged by commercial banks on current account overdrafts, but no less than 5% in any case.
- 3.4 The contractual partner's payments will firstly be applied against the oldest outstanding payments. If costs and interest have already accrued, payments shall first be credited against the costs, then the interest, and finally against the principle debt.
- 3.5 Payments due to Hawa may only be offset against the contractual partner's counter-claims, if Hawa has consented to this or if a res judicata decision has been issued to this effect.

4. Retention of title

4.1 The delivered goods shall remain the property of Hawa, until the payment of all of Hawa's claims against the contracting partner (including the settlement of all outstanding current account balances). In the event that various goods are combined, the retention of title shall endure in the relevant proportion of the value of the new goods. Hawa is entitled, without any involvement on the part of the contractual partner, to register the retention of title in the retention of title register («Eigentumsvorbehaltsregister») of the competent debt enforcement office, and the contractual partner authorizes Hawa to undertake the actions necessary for this purpose.

Subject to modification.

H A W A - General Terms and Conditions (GTC)

- 4.2 If the contractual partner resells the goods prior to the fulfilment of all of Hawa's claims, it here and now, by way of precaution, assigns to Hawa (irrespective of any legally valid retention of title) the corresponding claims established by way of the resale or arising through any other legal basis.
- 4.3 In the event of any third-party interference with the goods subject to a retention of title arrangement, the contracting partner shall be duty bound to indicate Hawa's ownership of said goods, and notify Hawa accordingly.
- 4.4 In the event of default of payment on the part of the contractual partner, Hawa shall be entitled to repossess the goods delivered. Hawa's repossession of goods shall not constitute any termination of the agreement, and will not release the contractual partner from its contractual duties.

5. Product performance, obligations to provide information and instructions

- 5.1 Unless the product performance is described in Hawa's current catalogues, brochures or service descriptions etc., the specifications of the specific products must be agreed with Hawa in writing. Unless an agreement has been made to the contrary, the technical specifications may be changed at any time.
- 5.2 The contractual partner acknowledges that the fitness for purpose of the products is dependent on a wide range of factors, and it undertakes to read the relevant design and assembly instructions.
- 5.3 In order to fulfil its obligations to provide information and instructions, Hawa provides contracting partners (usually specialist dealers, architects, designers, consultants, workshops/tradesmen, etc.) with catalogues, brochures, design and installation manuals, maintenance manuals, operational advice and training.
- 5.4 Contractual partners are duty bound to observe Hawa's product information. All requisite instructions are available on Hawa's website, or can also be requested from Hawa. They must be passed on to workshops/tradesmen and users as necessary.

6. Drawings and tools

- 6.1 Hawa reserves ownership to construction drawings prepared and issued by it specifically for a particular job. Unless Hawa has issued its consent, these may not be passed on to any other parties, or copied or otherwise reproduced.
- 6.2 Tools produced for special orders shall remain the property of Hawa. The contractual partner will not be able to demand them, even if it has contributed to the tool costs. Special agreements reserved.
- 6.3 Hawa shall not be liable for any and all consequences resulting from patent or other property right infringements resulting from deliveries made in accordance with the contractual partner's instructions. The contractual partner undertakes to indemnify Hawa fully and unreservedly in such cases.

7. Warranty of title, product warranty, liability

- 7.1 Hawa guarantees that the products do not violate the intellectual rights of any third parties.
- 7.2 The contracting partner must inspect supplies and services for defects immediately upon receipt. Hawa must be promptly notified of any complaints; otherwise the purchased goods are deemed accepted.
- 7.3 With the exception of parts subject to wear and tear, Hawa warrants the flawless functioning of the products delivered by it, as well as the durability of all parts, for a period of 2 years commencing from the transfer of risk. This product warranty does not include damage due to natural wear and tear, improper use, failure to observe installation and maintenance instructions, changes to the goods as delivered or to spare parts that do not correspond to Hawa's original specifications.
- 7.4 Hawa may demand that the contracting partner return parts about which a complaint has been justifiably made; this shall be performed at the partner's **cost** and risk. Defects affecting parts of a delivery do not entitle the contractual partner to reject or return the entire delivery.
- 7.5 In the case of justified complaints, the contracting partner is entitled to subsequent improvement (repair) or replacement of the defective part (the decision resting with Hawa). Subsequent improvements or substitute deliveries performed by Hawa are covered by the same product warranty that Hawa extended to the original delivery, except this shall be limited in time to 6 months following the acceptance of the subsequent improvement or the receipt of the substitute delivery.
- 7.6 **All other liability**, irrespective of the legal basis, **is explicitly repudiated**, insofar as this is legally permissible. This applies particularly to indirect and third-party damage.

8. Applicable law, legal venue

- 8.1 All contractual agreements concluded with Hawa shall **be exclusively governed by Swiss law** to the exclusion of the rules on the conflict of laws, and the United Nations Convention on Contracts for the International Sale of Goods (CISG).
- 8.2 The exclusive legal venue for all disputes arising from or in connection with the contractual agreements between Hawa and the contractual partner shall be that court with jurisdiction for the place at which Hawa has its registered address. Hawa is also entitled to pursue legal actions against the contractual partner before that court with jurisdiction for the place at which the latter has its registered address.
